

Delivering Compliance in the Cloud™

How will you track and report HCP and HCO spend?

The Solution is MediSpend®

Our SaaS cloud-based solution is pre-configured to meet your specific business needs and ensures compliance with the Patient Protection and Affordable Care Act.

MediSpend is continually updated and enhanced based on industry feedback and legal counsel provided by the Regulatory Law Group, PLLC.

MediSpend is a comprehensive cloud-based aggregate spend tracking and reporting compliance solution designed specifically for Pharmaceutical and Medical Device companies.

- Accurately identifies HCPs and HCOs by instantly identifying covered recipient data from both the local customer master and our reference database of 5.4 million records
- MediSpend integrates all data sources across the client enterprise including data from third-party providers
- Customized Natures and Purposes engine ensures accurate spend classification
- Easy to use Research and Events module efficiently and accurately manages and tracks research expenses and meeting related distributed spend transactions
- Adaptable spend limits and thresholds enforce internal business rules
- On demand report validation eliminates errors and omissions prior to final state and federal reporting
- One-click jurisdiction based reports tailored to your requirements and ad-hoc custom reports
